

### Friday - Division Word Problems

*Can you use your knowledge of dividing to solve the word problems below? Remember to write the number sentence and show your working out!*

**James has 6 bread rolls. He shares them equally between his 2 friends. How many do they have each?**

**A shop has 15 bags of crisps. 3 people want to buy them. If they share how many bags can they each buy?**

**The teacher buys 30 cupcakes. She shares them equally between her 10 children. How many cupcakes do they each have?**

**Mark buys 15 boxes of cereal for his family. They share them equally and each get 3 boxes. How many people are in his family?**

**Erin collects 21 shells. She shares them between 3 fishermen. How many shells do they each get?**

*Try the extension challenge on the challenges sheet if you would like an extra challenge!*
